

## **Contact Sheet Activity**

**Directions:** Read the following scenario and complete contact sheets accordingly.

### **Scenario**

You receive a page and the answering service tells you that Deb, a nurse at DHMC has called in regards to a sexual assault patient. The answering service gives you the ER phone number: (603) 650-7254. You call Deb back at DHMC at 10:30pm to let her know that you are on your way and should be there in about 20 minutes. That call lasts about two minutes.

At 11:05 you check in at the front desk and are brought back to the exam room where the victim, Ellen, is already with a SANE, Jane. The three of you talk together about the medical and legal options that are available to her. Ellen is unsure about what exactly she wants to do, but decides to have evidence collected. While Jane the SANE is preparing for the exam Ellen talks to you about how scared she is to go back to her apartment in Enfield because that is where the assault happened and the man, Dave, who raped her lives in her building. You ask her if there is anyone that she would feel comfortable calling and perhaps staying with, and she decides to call her friend Jessica. Once Ellen calls Jessica and explains that she is at the ER, Jessica, who lives very close by in Lebanon, rushes to DHMC to support her friend. Jessica arrives at DHMC around 11:30pm. Ellen doesn't want anyone else in the room with her during the exam, so you and Jessica wait outside. During that time Jessica asks you questions about how she can best support Ellen and wants to know more about WISE's services.

You leave the hospital at 1:07am.
